RE: Sioux Land Implement Company
EPA ID No. IAD022206890

Dear Mr. Fretz:

On August 18, 1987, authorized representatives of the Environmental Protection Agency (EPA) conducted a compliance evaluation inspection at the Sioux Land Implement Company. That inspection was conducted under Section 3007 of the Resource Conservation and Recovery Act (RCRA), U.S.C. Section 6927. The purpose of the inspection was to assess your facility's compliance with the hazardous waste regulations.

Although a Notice of Violation was not issued to you at the time of the inspection, a review of the inspection report reveals that your facility is in violation of 40 CFR 262.20(e)(2) for failure to retain a copy of your reclamation agreement with Safety Kleen. However, you did provide our representatives with invoices showing that Safety-Kleen is picking up your waste for recycling. Therefore, at this time you do not need to submit the contractual agreement to this office. However our inspectors will be requesting a copy of your contract during future compliance inspections of your facility, so we suggest you contact Safety-Kleen to obtain a copy.

The inspection report also noted that you have a drum of weak acidic solution at your facility. At the time of the inspection, you stated that the material is currently being used and therefore not a waste. We would like to caution you that before discarding this material, you should make a hazardous waste determination on the solution and dispose of it accordingly.

If you have any questions concerning this letter, you should contact Ms. Lynn Slugantz at 913/236-2887.

Sincerely yours,

David A. Wagoner
